

# Defence and Offset Profile

Aerospace, Defense and Security companies worldwide are facing unprecedented challenges to strike a balance between innovation, time to market, margin pressure and government regulations. The need for a global partner which can seamlessly integrate into company's supply chain, provide holistic solution to its customers' needs, add significant value to its product development process and to get an early edge in the competitive business ecosystem becomes an absolute necessity.

AXISCADES is one of India's leading Aerospace, Defense and Security companies with vast experience and expertise in handling complex programs, qualified to address the industry problems at various stages. AXISCADES's end-to-end capabilities in Software, Hardware, Product Development, Test Solutions, Obsolescence management and Manufacturing uniquely position it as a core engineering, development and production partner.

AXISCADES has expertise in Offset Management. Being a licensed Defense manufacturer, AXISCADES is a preferred choice for strategic partnerships to execute the Offset obligation. Currently, AXISCADES is one of the Indian Offset Partners in the Mirage 2000 aircraft upgrade program.
